Description

Javoříčské Caves are one of the longest and most beautiful caves in the Czech Republic. They were discovered in 1938 and a year later they were made available to the public. The length of the corridors is almost 6 km. The caves are unique with their rich, preserved and varied stalactite decoration. The cave offers 2 guided tours: a long one (790 m) and a short one (360 m). All tours are guided and last for 60 minutes (long route) or 40 minutes (short route). The caves are open from January to November.
