Description

The town museum in Třebechovice has existed since 1925. Over time it has become a specialized museum of nativity scenes. Currently it manages town collections and collection fund of nativity scenes. It is the only museum of its kind in Europe. It has more than 400 nativity scenes in its collection. The most precious nativity scene is Probošt's mechanical crib made of wood more than a hundred years ago. It consists of more than 2000 carved parts and covers an area of 6.9 x 1.9 x 2.2 m. The museum organizes nativity scenes featuring Czech and foreign nativity scenes and seasonal exhibitions on various topics. It is open all year round. Tours take place independently, without a guide.
